STUDENT INTERNSHIP POLICY

For Internship & Placement Partner Organisations

1. Preamble

Amal Jyothi College of Engineering (“AJCE” / “the College”), an autonomous institution, treats internships as an integral component of experiential learning. This document sets out the College's internship framework for the benefit of industries and organisations that host our students (“Partner Organisations”), the support the College extends, and the terms and standards Partner Organisations are expected to meet. It is aligned with the Internship Guidelines issued by the Internship Cell of AJCE and applies to all undergraduate and postgraduate programmes of the College.

2. Types of Internships Offered

Students of AJCE may undertake three types of internships:

1. **Short-Term Internships:** during semester breaks; minimum 1 week, maximum 4 weeks. Suitable for second- and third-year students (including two-month vacation engagements structured as consecutive approved terms under an MoU).
2. **Semester-Long Internships:** in the 7th or 8th semester (INT MCA 9th/10th, MCA 3rd/4th semester); duration 4 to 6 months. May be undertaken in lieu of the final-year project, subject to departmental approval.
3. **One-Year Internships:** during the final year, for students meeting the eligibility criteria prescribed in the College's internship guidelines.

In every case the engagement must have a genuine project component relevant to the student's discipline; pure training courses without a project component are not approved. Multidisciplinary projects are permitted with departmental approval, provided the primary task aligns with the student's core discipline.

3. Stipend and Paid Internship Period

- Semester-long and one-year internships shall be paid internships. The stipend amount and payment schedule shall be stated in the written internship offer.
- Any unpaid training or preparatory period at the start of the internship shall be limited to a maximum of one (1) month. The stipend shall be payable for the entire remaining internship period without exception.
- Stipend for short-term internships is encouraged, though not mandatory.
- Stipend commitments once made in the written offer shall not be reduced or withdrawn during the internship.

4. Conversion of Internship to Placement

- Semester-long and one-year internships under this Policy are positioned as a pathway to employment. The Partner Organisation shall state in the internship offer its commitment to convert the internship into a placement offer upon graduation for interns
- The performance criteria and the proposed post-conversion designation and remuneration range shall be communicated to the intern and the Training & Placement Cell at the start of the internship.

- Conversion decisions shall be communicated to the intern and the T&P Cell at least one month before the end of the internship. All placement offers arising from internships shall be routed through the T&P Cell.

5. What Partner Organisations Shall Provide

- **Written offer:** a signed internship offer (or MoU with the College) recording duration, stipend, nature of work, amenities, supervision and academic-leave commitments, issued before the student is relieved. Verbal assurances are not accepted.
- **External Supervisor:** a designated supervisor from the organisation who guides the intern's project, coordinates with the College's Internal Supervisor, and co-signs the final project report.
- **Accommodation and food:** where the internship requires residence away from home or campus, safe, clean and habitable accommodation and wholesome food — secure premises, hygienic sanitation, potable water, and reasonable proximity or transport to the workplace.
- **Academic access:** interns must be permitted to be physically present for end-semester evaluations and examinations at the College, and to attend interim evaluations (physical or online), assignments and other academic requirements. Leave for these shall be granted as required.
- **Attendance reporting:** a verified attendance report submitted to the Head of Department at regular intervals. Interns must maintain a minimum of 85% attendance, which counts towards their academic attendance.
- **Working conditions:** working hours, weekly offs and workload conforming to applicable law; no deployment on hazardous work without training, protective equipment and consent.
- **Completion certificate:** on company letterhead, specifying the internship period, nature of work / skills acquired and attendance percentage, along with a duly filled feedback form.

6. What the College Provides

- **Vetted, eligible students:** semester-long and one-year interns will have successfully completed all courses up to the 6th semester (INT MCA 8th, MCA 2nd semester) and hold departmental and institutional approval through the College's AES system.
- **Internal Supervisor:** a faculty supervisor for every semester-long / one-year intern, who validates attendance, monitors weekly progress reports and the internship diary, and jointly evaluates the project.
- **Single point of contact:** the Internship Cell and the Training & Placement Cell coordinate approvals, MoUs, scheduling and grievances.
- **Flexible academic mode:** interns may complete their remaining academic requirements in self-study mode, so the internship can run without interruption except for scheduled evaluations.
- **Continuity and discipline:** students shall not discontinue an approved internship without the written concurrence of the College; unsatisfactory performance or unauthorised absence may lead to cancellation of the internship and institutional disciplinary action.

7. Intellectual Property and Publications

In case of any publication or patent arising from the internship project, the College's name shall be specified as the affiliation of the students. Ownership of intellectual property generated during the internship shall depend on each party's extent of contribution and shall be governed by a prior written agreement; in its absence, IP shall be held jointly, in proportion to contribution, and recorded in a separate written agreement.

8. Welfare Safeguards and Breach

- Failure of a Partner Organisation to honour committed stipend, accommodation, food, academic access or other amenities shall be treated as a material breach. The College may withdraw its interns immediately without academic penalty to the students.
- If an internship is found not to meet standards or is unrelated to the student's field, the student shall intimate the department within two weeks of joining, and may rejoin the college with departmental approval.
- Interns may report grievances regarding stipend, amenities, treatment or safety to their Internal Supervisor, the Internship Cell or the T&P Cell; grievances are acknowledged within one working day, and safety or dignity concerns are escalated to the Principal immediately. The Internal Supervisor will proactively contact each residential intern at least once every two weeks.
- Early termination or extension of an internship shall be discussed with the Internship Supervisor / Project Coordinator and College authorities. The College shall not be responsible for liabilities caused by the student during the internship.

9. Engagement Procedure

- The Partner Organisation shares internship opportunities (roles, project areas, stipend, amenities, conversion terms) with the T&P Cell / Internship Cell.
- Students apply through the College's AES system — at least 1 week in advance for short-term and 15 days in advance for semester-long / one-year internships; institutional approval is notified within one week of a completed application.
- Letters of consent from the External and Internal Supervisors are obtained for final-year project-based internships, and the written offer / MoU is executed.
- The internship proceeds with periodic attendance reporting, weekly progress reports and interim evaluations, and concludes with the completion certificate, feedback form and joint evaluation of the project report.

10. Review and Amendment

This Policy shall be reviewed periodically by the Internship Cell, the T&P Cell and the Academic Council, and may be amended with the approval of the competent authority of the College. Matters not covered by this Policy shall be decided by the Principal.
