Preamble

The Training & Placement Cell (TPC) at Amal Jyothi College of Engineering exists to secure placement opportunities employment, higher studies or entrepreneurship for every Under Graduate and Post Graduate student. That mission has not changed. What has changed, decisively, is the world our graduates enter.

By 2030, an estimated 39% of the core skills required in today's jobs will have transformed; globally, 170 million new roles are expected to be created while 92 million are displaced (WEF, Future of Jobs Report 2025). For India, the stakes are sharper still: the nation could create up to 4 million new AI-enabled technology jobs by 2031 — or lose 1.5 million to inaction (NITI Aayog, 2025). Employability studies, including the India Skill Report, repeat the same message: degrees alone no longer place students; demonstrated, current, AI-era skills do.

This policy therefore takes a long-term outlook. It does not merely regulate this year's recruitment drives; it commits the College to a sustained programme of career readiness for the AI era — one in which every student, from every branch, graduates AI-capable, professionally grounded, and personally responsible for a career that can adapt and endure. It positions AJCE not only as a supplier of employable graduates but as a producer of job creators: entrepreneurs who will themselves provide employment to others.

The Placement Cell operates round the year to connect students with companies, institutions and opportunities. This document — the successor to the Placement Policy & Brochure of October 2022 — states the policy, objectives, procedures and rules under which it does so, and, in Section 10, a one-year implementation plan for the digital systems that will carry them.

Guiding motto: Knowledge + Skill + Value = Employability + Career Sustainability.

Knowledge comes from the classroom; skill from practice, competition and industry exposure; value from professional ethics and character. Together they produce not just a first job, but a career that lasts.

Section 1 — Role of the Training & Placement Cell

The TPC caters to the employability and overall personality development of every passing-out Amalite. Its role in the functioning of the College covers the following areas:

1. **Career Readiness.** Equipping every student with the aptitude, communication, technical and AI-era skills that recruitment now demands, assessed and rebuilt continuously, not once in the final year.
2. **Responsibility Building.** Creating awareness among students that securing a career is first their own responsibility: the TPC provides awareness, training and opportunities; the student must supply effort, participation and initiative.

3. **Training.** Pre-placement training programmes: aptitude tests, group discussions, interviews, presentations, and soft skills in collaboration with the Department of Humanities and the core departments, now extended with AI-literacy and AI-tools training for all branches.
4. **Internships & PPIs.** Sourcing internships and pre-placement interviews/offers as a primary hiring channel, with academic coordination through the departments.
5. **Placement Opportunities.** Organising on-campus and off-campus recruitment, pooled drives and verified off-campus referrals round the year.
6. **Leadership in Skill Training for the AI Era.** Acting as the College's nodal agency for AI-era upskilling mapping training to the five AI skill segments (AI-informed to AI-expert) so that every student, circuit and non-circuit, graduates at least AI-user capable (Annexure A).
7. **Engaging Job Providers.** Building durable relationships with employers, alumni and incubators — and supporting student ventures that will themselves become job providers.
8. **Student Placement Leadership.** Establishing a structured Student Placement Ambassador Programme with representatives from each department. Ambassadors act as a communication bridge between the TPC, departments and students, support placement-awareness activities, coordinate student communication during recruitment drives, and assist in placement-readiness initiatives. The current department-wise list of Ambassadors is at Annexure B.

Department Placement Committees

Each department shall constitute a Department Placement Committee comprising the Head of Department, Department Placement Coordinator(s), nominated faculty members and Student Placement Ambassadors. The Committee shall monitor student placement readiness, coordinate departmental training, facilitate industry interaction, and communicate placement-related requirements to students and the TPC.

Alumni Engagement

The TPC shall develop an active alumni career network for mentoring, industry referrals, internships, mock interviews, career talks, recruitment referrals and professional networking.

Post-Drive Evaluation

After recruitment drive, the Placement Assistance Cell of each department evaluates its students' stage-wise performance. This objective appraisal identifies strengths and weaknesses, drives corrective training, and extends intensive supportive measures to candidates who were not selected.

Section 2 — The Placement Policy

Keeping the jobs of 2030 in mind, the Placement Policy of the College is to secure the following:

1. **Universal Career Success.** The maximum number of students achieve their declared career goal through employment, higher studies or entrepreneurship.
2. **AI Skill Capability for All.** Every student — circuit and non-circuit branches alike — attains demonstrable AI-era skills appropriate to their discipline. AI-readiness training is universal, not an elective for computer-science students.
3. **Responsibility and Readiness.** Students are made aware that employability is earned: the College builds the pathway, and each student is expected to walk it — maintaining readiness, participating in training, and continuously improving their skills.
4. **Upskilling Through Achievement.** Students shall be motivated and supported to upskill and earn placement through hackathons, national-level competitions, national-level examinations (GATE, CAT, GRE and equivalents), internships and industry collaborations, and training in nationally accredited laboratories and centres. Verified achievements of these kinds are treated as placement credentials.
5. **Training Matched to 2030 Job Studies.** Pre-placement training is aligned to published studies of emerging fields and skill requirements (Annexure A), and refreshed every year as those studies evolve.
6. **Quality Beyond Benchmarks.** Placed students are equipped to exceed the quality benchmarks set by their placements — and the College pursues continuous improvement in offer quality, with median LPA improvement as a standing agenda of the TPC and Advisory Committee.
7. **Job Creators Along with Job Seekers.** The College targets producing employers, not only employees: entrepreneurship is a placement outcome of equal honour, supported through incubation, mentorship and a deferred-placement safety net.
8. **Value-Based Professionals.** Professional ethics and value-based training are integral to placement preparation — integrity in assessments, honesty in credentials, and character in the workplace.
9. **Industry Connect and Experiential Learning.** The College shall strengthen sustained engagement with industry through industry talks, expert sessions, company visits, industry mentoring, live projects, internships, industry-sponsored projects, professional certifications, alumni engagement and other structured industry-academia initiatives.

The TPC shall endeavour to bring students and potential employers together and facilitate interactions between the two — physically, virtually, and through every legitimate channel the modern hiring landscape offers.

Section 3 — Objectives of the Placement Cell

Every objective below serves the College's Knowledge + Skill + Value equation. The Placement Cell is established with the following well-defined objectives:

- To act as a bridge between students, alumni and the employment community — and to assist employers in achieving their hiring goals.
- To assist students in obtaining final placement in reputed companies, and to raise offer quality year on year (LPA improvement agenda).
- To assist and guide students in recruitments, higher studies and entrepreneurship — treating job creation as highly as job seeking.
- To build in every student the awareness that career readiness is their own responsibility, and the self-reliance, attitude and communication skills to carry it.
- To provide AI-era skill training to all branches — circuit and non-circuit — mapped to the five AI skill segments (Annexure A), so that every graduate is at least AI-user capable.
- To motivate and enable students to upskill through hackathons, national-level competitions and examinations, internships, industry collaborations, and training in nationally accredited labs.
- To organise pre-placement training, workshops and seminars based on published studies of 2030 job and skill requirements in emerging fields.
- To impart professional ethics and value-based training as a core component of employability — not an add-on.
- To establish a structured industry-connect ecosystem involving employers, alumni, professional bodies, startups and industry experts to provide students with continuous exposure to current technologies, workplace expectations and emerging career opportunities.
- To establish a structured Student Placement Ambassador Programme and Department Placement Committees to strengthen placement communication, student engagement and departmental coordination.
- To facilitate awareness and access to international employment, internships, higher education and professional opportunities through global industry engagement, alumni networks and appropriate career guidance.
- To coordinate industrial visits, project works and training/internship programmes, and conduct career guidance and counselling.
- To conduct regular aptitude training, soft-skills training, mock interviews and mock group discussions; to organise GATE coaching; to assist in professional résumé preparation; and to train students in etiquette and grooming.
- To collect employer feedback and implement remedial measures, and to extend intensive supportive measures to candidates who are not selected.

Section 4 — Advisory Committee

A standing Advisory Committee provides directives to the TPC for its functioning. It meets at least once per semester and as required. Its composition is defined by office; incumbents are recorded separately by the TPC each academic year.

Office	Incumbent	Role
Director (Administration)	Fr. Dr. Roy Abraham Pazhayaparambil	Chair
Principal	Dr. Lillykutty Jacob	Co-chair
Dean (Academic)	Fr. Dr. Rubin T. Jose	Member
Placement Officer	Dr. Tom Sunny	Convenor
Faculty Coordinator (Placement)	Dr. Abi Varghese	Co-Convenor
Faculty Coordinator (Placement)	Mr. Jayakrishnan R	Co-Convenor
Heads of Departments	See Annexure D	Members (all departments)
Department Nominees	See Annexure C	One faculty member per department
Student Ambassadors	See Annexure B	Student voice; placement communication within batches

The Committee approves the annual placement calendar, reviews offer-quality (LPA) progress, sanctions exceptions to this policy, and oversees the One-Year Plan (Section 10). Decisions of the TPC may be escalated to the Committee; decisions of the Committee, to the Principal, whose decision is final within the College.

Annual Placement Calendar

The Advisory Committee shall approve an annual placement and career-readiness calendar covering training, assessments, industry interactions, internships, recruitment drives, higher-study guidance, entrepreneurship activities, competitions and major placement milestones.

Section 5 — Student Registration and Readiness

5.1 Categorisation

Students are categorised on their declared future plan — job career, higher studies, or entrepreneurship — at the start of the pre-final year. A detailed database of candidates opting for a job career is maintained by the TPC. The declared track may be changed once per semester.

5.2 Registration and Readiness Training

To register with the Placement Cell, completion of the foundation aptitude training (approximately ten days) is mandatory for all branches — circuit and non-circuit. The foundation module now includes AI literacy. Sessions on résumé building, interview preparation and soft skills follow through the year.

5.3 The Readiness Pathway

Alongside training, every placement-track student is expected to build a verified record of achievement through the channels the College recognises as placement credentials:

- Hackathons and national-level competitions.
- National-level examinations (GATE, CAT, GRE and equivalents).
- Internships and industry collaborations, with pre-placement interviews (PPIs) where offered.
- Certified training in nationally accredited laboratories and centres of excellence.

The TPC provides adequate awareness of and access to these opportunities. Participation is recorded and subsequently reflected in the student's Placement Readiness Profile. Students are counselled each semester on their readiness standing.

5.4 Placement Readiness Profile

Every student registered with the Placement Cell shall maintain a verified placement-readiness profile containing academic performance, aptitude readiness, technical skills, AI skills, certifications, internships, projects, hackathons and competitions, industry exposure, professional résumé, LinkedIn profile and other relevant achievements. The profile shall be periodically reviewed by the TPC and the concerned department.

5.5 Placement Hour

The College shall provide a dedicated Placement Hour within the academic timetable for structured career-readiness activities including aptitude, coding, communication, résumé development, LinkedIn and professional profile development, AI tools, interview preparation, industry awareness and placement-related assessments.

5.6 Recruitment Drives

When a company approaches for recruitment, the job description, eligibility criteria, salary details and registration link are shared with all eligible candidates. Interested and eligible candidates register for the drive; registration commits the student to complete its stages. A minimum of three working days is given to apply.

5.7 Offers and Placement Upgradation

The College follows a one-student-one-job policy, with defined upgradation: a student who has secured a placement may participate in subsequent recruitment opportunities only where the opportunity is classified as an upgrade by the TPC/Advisory Committee, based on compensation, role quality, career potential or other defined criteria. The criteria for such upgradation shall be published to students before the

commencement of the placement season. A student may hold at most one upgrade across the season. Declining an offer after acceptance, or failing to join without cause, is treated as a serious disciplinary matter.

5.8 Rules of Conduct

Students represent the College in every recruiter interaction. Malpractice in assessments, misrepresentation of credentials, impersonation, and absence from committed drives without documented cause attract graduated penalties — from written warning, through suspension from drives, to removal from placement for the season — always with a written statement and a hearing before penalty. Students shall maintain professional conduct in all interactions with recruiters, including timely registration, attendance, communication, submission of documents and completion of recruitment processes. Any withdrawal after acceptance of an offer shall require a documented justification and shall be dealt with in accordance with the applicable College rules.

Limit of the Placement Cell's Role After an Offer

Once a student has received the offer letter, the employment relationship is directly between the student and the company. The Placement Cell shall not be the authority for further proceedings with the company thereafter — including delays in onboarding or joining date, changes to the offered terms, deferment, revocation, salary or documentation matters, or any subsequent employment condition. The Cell will assist by way of communication and follow-up wherever possible, but it neither guarantees nor is accountable for the company's post-offer decisions, which the student shall pursue directly with the employer.

Grievance and Appeal

Students may submit placement-related grievances or appeals to the Placement Officer. Where required, the matter may be escalated to the Advisory Committee, subject to applicable College regulations.

5.9 Continued Support

Students who remain unplaced at graduation receive off-campus referral and reskilling support for at least one year. Entrepreneurship-track students may defer placement participation for up to two years while their venture establishes itself.

5.10 Minimum Placement Readiness Criteria

Placement opportunity shall be supported by demonstrated placement readiness. Before a placement-track student can be certified Placement Ready, they shall complete the following, tracked through the Placement Readiness Profile:

- Minimum 2 Industrial Visits
- Minimum 1 Internship
- Minimum 1 Industry-linked / Industrial Project
- Completion of Foundation Aptitude Training and its assessment
- Mandatory AI Literacy / AI Tools Training
- Minimum 1 relevant technical certification or course
- Completion of Communication & Soft Skills Training and its assessment

- A verified professional Resume/CV
- A professional LinkedIn profile
- Minimum 1 Technical Mock Interview
- Minimum 1 HR Mock Interview
- Minimum 1 Group Discussion assessment
- Minimum 2 Industry Expert Sessions / Career Talks
- Completion of Professional Ethics & Value-based Training
- Completion of the Placement Readiness Profile / Digital Career Portfolio

Achievement Basket

In addition, a student shall complete any three of the following to be recognised for advanced standing: Hackathon; national-level technical competition; additional internship; professional certification; research project/publication; industry certification; GATE/CAT/GRE or equivalent preparation/examination; entrepreneurship/start-up activity; national-level technical event.

Readiness Classification

Based on the above, the TPC shall classify each placement-track student, visible to the student on the Placement Readiness Profile:

Classification	Criteria
Placement Eligible	Meets a given company's stated eligibility criteria (Section 5.6).
Placement Ready	Meets AJCE's minimum readiness criteria above.
Placement Advanced	Placement Ready, and has completed the Achievement Basket (any three items above).

A student who has not yet completed the minimum readiness criteria is not permanently denied placement: the TPC shall identify the pending requirements and give the student the opportunity to complete them, after which the student is classified Placement Ready.

Section 6 — Mock Interviews and Interview Preparedness

Mock interviews resemble a real interview as closely as possible, so that candidates understand what is expected, overcome fear, and improve their self-presentation. Interviewers give tips on what hiring professionals look for, how to prepare, how to handle nerves, and best practice in following up.

Mock interviews are held for all candidates registered with the Placement Cell. Technical interviews are conducted by the concerned department faculty; HR interviews are conducted by the Placement Cell and Humanities department faculty. Students receive structured feedback and corrective measures based on their performance.

Updated for the AI era: mock rounds shall also mirror the formats students now actually face — online assessments, recorded video interviews and virtual panels — so that the first algorithm-mediated interview

a student encounters is never the real one. Students are also trained to use AI tools legitimately in preparation (résumé refinement, practice questioning), and warned clearly that covert AI assistance in a live assessment is malpractice.

Section 7 — Reporting and Transparency

Information on the Placement Cell, its office bearers, year-wise placement statistics, recruiters, digital badges and certificates is published and kept current on the College website.

Annual Report

Detailed placement statistics — department-wise placement percentage, eligible and registered candidates, total offers, median and mean CTC, highest CTC, internship-to-offer conversion, number of recruiters, repeat recruiters, higher-studies admissions, entrepreneurship outcomes and other relevant graduate outcomes — shall be published through the annual Placement Report, from 2026 onward and wherever data is available. LPA improvement — raising the median offer ahead of sector inflation — is a standing agenda item reviewed by the Advisory Committee each semester.

Graduate Outcomes

The TPC shall track and report graduate outcomes beyond conventional campus placements, including employment, higher studies, entrepreneurship/start-up ventures, government employment, research opportunities and other significant career outcomes. These outcomes shall be included, wherever feasible, in the annual placement report.

Annual Placement KPIs

The TPC shall track measurable indicators each year, including: placement percentage, median CTC, number of new and repeat recruiters, internship-to-offer conversion, industry engagements conducted, certifications and competitions completed by students, and higher-studies and entrepreneurship outcomes.

Section 8 — Facilities and Industry Connect

A multitude of physical facilities are available with the TPC to carry out all activities of the Cell. These facilities also host the College's industry-connect programme: talks, expert sessions, mentoring and live-project briefings that keep training grounded in current industry practice.

Facility	Purpose
Interview Hall	10 independent cubicles for personal interviews
Alphonsa Hall	Seats 200 — pre-placement talks and general sessions
Central Computing Facility	Networked computers for conducting online tests
Language Lab	Enhancing communication skills

Section 9 — One-Year Digital Implementation Plan

The following modernisation measures are not in immediate effect. They constitute a one-year implementation plan, to be executed in phases under the oversight of the Advisory Committee, and brought into force by notification as each phase is ready. Until each phase is notified, the existing procedures of Section 5 apply. The Placement Officer reports implementation progress to the Advisory Committee every quarter.

Quarter 1: AJCE Placement Portal — Foundation

A single digital system for student registration, profiles, job postings, automated eligibility matching and application tracking. To be piloted with one graduating batch.

Quarter 2: Digital Skill Passport & Consent

A verified digital record of each student's qualifications, achievements (hackathons, competitions, internships, accredited-lab training) and certifications, with per-drive digital consent for data sharing, aligned to the Digital Personal Data Protection Act, 2023. The Digital Skill Passport shall function as a verified student career portfolio.

Quarter 3: AI-Screening Norms for Recruiters

Disclosure of AI-assisted stages in every posting; human review of contested rejections; category-level feedback to rejected candidates; proctoring transparency (what is monitored, retention limits); supervised on-campus facilities so no student loses an opportunity for lack of hardware.

Quarter 4: Full Transition and Audit

All drives run end-to-end on the Portal with immutable records; grievance and appeal workflow online; first annual statistics release computed from Portal data; review by Advisory Committee and formal notification of the rules as standing policy.

Section 10 — Placement Cell Officers

All activities at the TPC are managed by the officers below. Incumbents and contact details are published by the College each academic year.

The Placement Officer shall be responsible for the overall coordination and implementation of this policy, subject to the directions of the Advisory Committee and approval of the competent College authorities.

Closing Statement

Amal Jyothi College of Engineering makes all efforts to see that every student of the College is well placed — in a job, in higher studies, or at the head of their own venture — after completing their programme. These efforts accomplish the stated Vision and Mission of the College.

This policy extends that commitment into the AI era: readiness built early, responsibility owned by the student, skills proven through national-level achievement, values held throughout, and a Placement Cell that leads the College's skill-training mission for the jobs of 2030.

Knowledge + Skill + Value = Employability + Career Sustainability

Annexure A — AI-Era Skills Framework

Indications below are drawn from the WEF Future of Jobs Report 2025, NITI Aayog's Roadmap for Job Creation in the AI Economy (2025), the Deloitte–Nasscom Advancing India's AI Skills framework, and national employability studies including the India Skill Report. The TPC refreshes this annexure annually; training plans (Section 5) are derived from it.

A.1 Emerging Job Families

Category	Representative Roles
AI & Machine Learning	AI/ML engineer, AI architect, prompt engineer, AIOps engineer, AI ethics & governance specialist
Data & Analytics	Data engineer, data scientist, business-intelligence analyst, data-governance officer
Frontier Intersections	Quantum-ML engineer, robotics engineer, autonomous-systems specialist, digital-twin engineer
Cybersecurity	Security analyst, AI-security specialist, digital-forensics engineer
Green & Energy Transition	Renewable-energy engineer, EV and battery engineer, environmental & sustainability engineer
Smart Manufacturing (core branches × AI)	Industry 4.0 engineer, mechatronics specialist, predictive-maintenance engineer, additive-manufacturing engineer
Construction-Tech & Infrastructure	BIM specialist, smart-infrastructure engineer, geospatial analyst
Health & Bio-Engineering	Biomedical device engineer, health-informatics specialist
Care, Education & the Human Core	Roles where human judgement, empathy and communication remain central — growing alongside automation

A.2 Top Ten Employability Skills

Note the mix: half are human skills. Value-based training, communication and leadership are employability skills, not soft extras — which is why they sit inside this policy's motto.

1. AI and big data
2. Networks and cybersecurity
3. Technological literacy
4. Creative thinking
5. Resilience, flexibility and agility
6. Curiosity and lifelong learning
7. Leadership and social influence
8. Analytical thinking
9. Environmental stewardship
10. Systems thinking

A.3 AI Skill Segments

Level	Description	Applicable To
AI Informed	General AI literacy	Every student, every branch
AI User	Uses AI to be more productive in one's own discipline	Every placement-track student — circuit and non-circuit
AI Integrator	Integrates AI tools into workflows and products	Circuit branches; motivated others
AI Builder	Develops AI software and applications	CSE / AI-adjacent students
AI Expert	Advances AI itself — models, research	Research pathway, selected by aptitude

A.4 Implementation Actions

- AI-literacy and AI-tools modules for all branches, embedded in foundation aptitude training.
- Discipline-specific "AI in my field" workshops — AI in mechanical design, in civil/BIM, in electrical systems, in electronics, in computing.
- Hackathon and competition calendar published each semester; participation counselled and credited.
- Structured coaching for national examinations (GATE and equivalents) and guidance for higher studies.
- Internship and accredited-lab training pipeline with department coordination.
- Professional-ethics and value-based modules in every training cycle — integrity, accountability, workplace character.

Annexure B — Student Placement Ambassadors

Student Placement Ambassadors represent every department across the Second, Third and Fourth Year batches (Section 1). Details below are current for the 2026–27 academic year and are updated by the TPC as batches change.

Annexure C — Faculty Placement Coordinators

Faculty Placement Coordinators liaise between the TPC and their department (Section 1, Department Placement Committees). Some coordinators are shared across sections of the same programme. Names below are current for 2026–27 and updated by the TPC as nominations change.

Department(s)	Coordinator
Dept. of Mechanical Engineering (Automobile)	Mr. Arun Thomas George Assistant Professor +91 8606071776 arunthomasgeorge@amaljyothi.ac.in
Civil Engineering (CE)	Ms. Jiss Abraham Associate Professor +91 9447151932 jissabraham@amaljyothi.ac.in
Computer Science & Engineering / Cyber Security	Ms. Betzy Babu Thoppil Assistant Professor, +91 6282476600 betzybabuthoppil@amaljyothi.ac.in
Chemical Engineering (CH)	Dr. Jerin Jose Assistant Professor +91 883 859 9024 jerin.jose@amaljyothi.ac.in
Electronics & Communication Engineering (ECE)	Mr. Binu Mathew Assistant Professor +91 9496325256 binumathew@amaljyothi.ac.in
Electrical & Electronics Engineering (EEE)	Mr. Joffie Jacob Assistant Professor +91 9961316105 joffiejacob@amaljyothi.ac.in
Computer Technology and AI & Data Science (CT/AD)	Mr. Thomas Varghese Associate Professor +91 94462 64778 thomasvarghese@amaljyothi.ac.in
Mechanical Engineering (ME)	Dr. Abi Varghese Assistant Professor +91 9746627877 abivarghese@amaljyothi.ac.in
Metallurgical & Materials Engineering (MME)	Mr. Mebin T. Kuruvila Assistant Professor +91 9567693473 mebintkuruvila@amaljyothi.ac.in
Food Technology (FT)	Dr. Swaroop S Kumar Assistant Professor +91 94972 87121 swaroopskumar@amaljyothi.ac.in
Computer Applications — MCA / MCA (Integrated) / BCA	Mr. Ajith G S Assistant Professor +91 99952 08817 gsajith@amaljyothi.ac.in

Annexure D — Heads of Department

Incumbents as recorded by the TPC for 2026–27, and updated as nominations change.

Department	Head of Department
Chemical Engineering (CH)	Dr. Surej Rajan C
Civil Engineering (CE)	Dr. Margret Sherin Joseph
Computer Science & Engineering / Cyber Security (CS)	Dr. Juby Mathew
Electronics & Communication Engineering (ECE)	Dr. Gee Varghese Titus
Electrical & Electronics Engineering (EEE)	Dr. Kumar S N
Computer Technology and AI & Data Science (CT/AD)	Dr. Manoj T. Joy
Mechanical Engineering (ME)	Dr. Joby George
Mechanical Engineering (Automobile) (MEA)	Dr. J.P. Ajithkumar
Metallurgical & Materials Engineering (MME)	Dr. Manu Harilal
Food Technology (FT)	Dr. Sunnichan V George
Computer Applications — MCA / MCA (Integrated) / BCA	Dr. Bijimol T K

Dr. Tom Sunny
Placement Officer
Amal Jyothi College of Engineering

Dr. Lillykutty Jacob
Principal
Amal Jyothi College of Engineering
